TECHNOLOGIES

Languages: TypeScript, JavaScript (ES6+), Python, SQL, Java

FrontEnd: React, Next.js, Redux, Tailwind CSS, MUI

Data & Spatial Systems: GIS, Mapbox, Pandas (NumPy, Matplotlib, Plotly)

Backend & APIs: Node.js, REST APIs, GraphQL

Testing: Jest, Mocha, React Testing Library, WebdriverIO, BrowserStack, TDD

Cloud & Infra: OCI, Jenkins, Grafana, Splunk

Developer Tools: Git, Version Control, Webpack, Cline, Codex

WORK EXPERIENCE

Oracle, Oracle Cloud Infrastructure, DevOps Portal

Jan. 2025 – Current

Software Engineer

Hybrid

- **Co-owned** 3 core repositories including the DevOps Portal UI serving ~**30,000** internal users.
- **Rebuilt** a legacy log viewer handling ~**800** daily builds replacing legacy implementation with a virtualized table reducing load times from **5 minutes to ~2** seconds using React/TypeScript. Shipped under strict TDD with Jest and React Testing Library.
- **Built** and **shipped** a reusable CSV/JSON export component for DevOps component library adopted across the OCI engineering org. Designed a V2 with polling logic for backend-paginated datasets. Authored Storybook documentation and added unit test coverage with Jest.
- Independently migrated the Source Control Management team from a monolithic repo to an independent plugin, migrating ~**50 files** and creating Terraform infrastructure for sandbox and production environments.
- **Implemented** a feature flag to transition ~**2,000** users off a legacy API. Collaborated cross-functionally with the CI/CD validating behavior in staging and deployment.
- **Accelerated** feature delivery by applying AI assisted development tools including Cline and OpenAI Codex in day-to-day work.
- Owned on-call responsibilities including production deployments, Terraform bucket creation(s), Grafana monitoring, and Jira triage; hosted office hours to support plugin development teams and managed team Slack channels.

Sep. 2022 – March 2024

Software Engineer

Hybrid

- **Implemented** a **new** eligibility and redirection feature in the router layer using JavaScript and SSR, reducing checkout latency by ~**3** seconds for **45%** of checkout to enhance the checkout platform, covered by a full test suite.
- **Developed** a proof of concept using the Apollo Server plugin to cache **GraphQL** responses within the mid-tier layer using JavaScript.
- **Increased** test coverage by **90%** using Mocha and test-driven development ensuring the functionality and accuracy of new product features to meet Q1 goals.
- **Developed** and **maintained over 15+ observability** dashboards using Splunk to detect and investigate root cause of problems in production quickly.
- **Designed, developed** and **maintained** automated test suites with **over 20 tests** for a new checkout route using **Object-Oriented Design Principles**, BrowserStack, and WebdriverIO. This effort increased code coverage and automation metrics as part of Q2 goals.
- **Collaborated** with the external BrowserStack team to develop the **first iOS automated test** with Apple Pay wallet integration kickstarting Apple Pay testing to ensure seamless functionality on mobile platforms and increasing our automation testing as part of Q2 goals.
- **Experienced** in an **Agile** environment, contributing to daily scrum meetings, providing technical input on planning, design and requirements for new features, reviewing and providing feedback on PRs, maintaining

detailed documentation, providing estimates during story grooming sessions, and leading retrospectives.

June 2021 – Sep 2021

Software Engineer Intern

Remote

- **Conducted** comprehensive research on SharpR, analyzing click rates and benchmarking against industry competitors.
- **Designed** UX prototypes to enhance button click rates based on research data using Figma.
- **Communicated** and **collaborated** with designers and product manager to iterate on existing designs, get feedback on designs and define new features.
- **Developed** button designs using React and documented code changes on Confluence in order to use in upcoming A/B experiments.
